Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2019.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

For the reporting period from January 1, 2019 to December 31, 2019, Inogen, Inc. (the “Company”) evaluated its current products and determined that certain “conflict minerals,” as defined in Section 1, Item 1.01(d)(3) of Form SD, are necessary to the functionality or production of products manufactured by the Company, which are referred to in this Form SD as “necessary conflict minerals.” Accordingly, the Company conducted a reasonable country of origin inquiry to determine whether during 2019 its necessary conflict minerals originated in the Democratic Republic of the Congo or certain adjoining countries, which are referred to in this Form SD collectively as the “covered countries.” The Company then conducted due diligence designed to conform to the Organisation for Economic Co-operation and Development, or OECD, Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas in order to determine whether any of the Company’s necessary conflict minerals originated from any of the covered countries and whether these conflict minerals benefitted, directly or indirectly, armed groups in any of the covered countries.

Conflict Minerals Disclosure

In accordance with Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, and this Specialized Disclosure Report on Form SD, the Company is filing a Conflict Minerals Report as Exhibit 1.01 hereto. A copy of this Form SD and the Conflict Minerals Report are publicly available at <http://investor.inogen.com/>.

Item 1.02 Exhibit

In accordance with Rule 13p-1, and Item 2.01 of Form SD, the Company is filing its Conflict Minerals Report as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this Form SD.

Exhibit No.	Description
1.01	Inogen, Inc. Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.

EXHIBIT INDEX

Exhibit No.	Description
1.01	<u>Inogen, Inc. Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.</u>

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Inogen, Inc.
Conflict Minerals Report
For The Reporting Period from January 1, 2019 to December 31, 2019

Cautionary Note Concerning Forward-Looking Statements: This Conflict Minerals Report contains forward-looking statements within the meaning of federal securities laws. These forward-looking statements include statements concerning Inogen's objectives for its conflict minerals policy and compliance initiatives and actions it intends to take relating to conflict minerals. Forward-looking statements involve substantial risks and uncertainties that could cause actual results to differ materially from currently anticipated results. When considering forward-looking statements, you should consider, among other factors, the risk factors described in the reports and other filings that Inogen files with the United States Securities and Exchange Commission, including Inogen's Annual Report on Form 10-K for the year ended December 31, 2019 and its subsequent Quarterly Reports on Form 10-Q. The risk factors included in these filings are not exhaustive, and risks that are not identified therein could materially affect whether Inogen realizes the results anticipated or implied by any forward-looking statements contained in this Conflict Minerals Report. Except as required by law, Inogen disclaims any obligation to update these forward-looking statements, whether as a result of new information, future events, or otherwise.

Introduction

This Conflict Minerals Report (this "Report") for Inogen, Inc. ("Inogen" or "we" or "our") covers the reporting period from January 1, 2019 to December 31, 2019 and is presented in accordance with Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended ("Rule 13p-1"). This Report is filed as Exhibit 1.01 to our Specialized Disclosure Report on Form SD (the "Form SD"). A copy of this Report and the Form SD are publicly available on our website at <http://investor.inogen.com/>. Information contained on, or that can be accessed through, our website, does not constitute part of this Report and inclusion of our website address in this Report is an inactive textual reference only.

In 2010, the United States enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Act"). Section 1502 of the Act relates to conflict minerals and requires companies subject to the Act to file a Form SD annually with the United States Securities and Exchange Commission ("SEC") to disclose whether the minerals specified in Rule 13p-1 and their derivatives, limited to tungsten, tantalum, tin, and gold (referred to as the "3TG"), used in their products benefitted, directly or indirectly, armed groups in the Democratic Republic of the Congo and adjoining countries (collectively, the "Covered Countries"). This Report, which is an exhibit to our Form SD, describes the design and implementation of our conflict minerals due diligence measures undertaken, including a description of how these measures were designed to determine, to our knowledge, the source mines, countries of origin, and processing facilities for 3TG contained in components used in our products.

Inogen Background and Covered Products

We are a medical technology company that primarily develops, manufactures and markets innovative portable oxygen concentrators used to deliver supplemental long-term oxygen therapy to patients suffering from chronic respiratory conditions. We manufacture our products at our facilities in Richardson, Texas Goleta, California, and at our contract manufacturer, Foxconn, located in the Czech Republic. In the United States, we market and distribute our products directly to consumers, through a wide variety of direct-to-consumer marketing strategies including a physician referral model, as well as through distributors, resellers, private label partners, and home medical equipment providers. In addition, we sell through distributors, resellers, and home medical equipment providers in certain markets within Europe, the Asia-Pacific region, Latin America, the Middle East, and Africa. Our manufacturing operations require a wide variety of raw materials that we rely on third-party manufacturers to supply.

We have determined that one or more of the 3TG may be necessary to the functionality or production of the oxygen concentrators we manufactured during 2019, including our Inogen One G3, Inogen One G4 and Inogen One G5 and Inogen At Home. As a result, all of our products are considered "covered products" for purposes of this Report.

Our supply chain with respect to the covered products is complex, and there are many third-parties in the supply chain between the original source of the 3TG and the manufacturer of the covered products. We do not purchase raw ore or unrefined 3TG directly and make no purchases in the Covered Countries. As a result and as described more fully below, we rely on our suppliers to provide information on the origin of the conflict minerals contained in our products.

Inogen Reasonable Country of Origin Inquiry

In accordance with Rule 13p-1 and Form SD, we determined that one or more of the 3TG may be necessary to the functionality or production of our products and that such 3TG are incorporated into our products during the manufacturing process. Accordingly, we undertook a reasonable country of origin inquiry (“RCOI”). This good faith RCOI was reasonably designed to determine whether any of the 3TG incorporated into our products originated in the Covered Countries.

Our RCOI consisted principally of submitting the conflict minerals reporting template (the “RMI Template”) prepared by the Responsible Minerals Initiative (“RMI”), formerly the Conflict-Free Sourcing Initiative (“CFSP”), an initiative of the Responsible Business Alliance, to suppliers of components for our products that are considered necessary to the functionality or production of our products and for which any 3TG or their derivatives may be included (“first-tier suppliers”). We reviewed all responses for completeness, reasonableness, and consistency, and we followed up for corrections and clarifications as we determined appropriate.

Inogen’s Due Diligence Process

Our due diligence measures were designed to conform, in all material respects, with the framework in the Organisation for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (the “OECD Framework”). The objectives of our diligence initiative were to determine, to the best of our ability, whether one or more of the 3TG is incorporated into our products; whether any such 3TG incorporated into our products was necessary for the functionality and/or production of our products; the source and chain of custody of the 3TG necessary for the functionality and/or production of our products; and whether any such 3TG originated in the Covered Countries. In the event that 3TG from the Covered Countries which benefit armed groups are found in our supply chain, we will take appropriate actions in a timely manner to resolve the situation.

Due diligence measures that we implemented included, but were not limited, to the following:

1. Establishment of Internal Management Systems

- a. *Conflict Minerals Policy.* In 2015, we adopted a written policy relating to the use of conflict minerals in our supply chain, which we reviewed and updated in 2017. We have communicated this written policy to our first-tier suppliers. A copy of Inogen’s Conflict Minerals Policy is publicly available at <https://investor.inogen.com/corporate-governance/governance-documents>.
 - b. *Internal Management to Support Supply Chain Due Diligence.* The Inogen finance department has been charged with the management of our conflict minerals program, working in collaboration with members from our operations team in California and Texas and our contract manufacturer in the Czech Republic.
 - c. *Controls and Transparency.* As described above, we undertook a RCOI with respect to conflict minerals in our supply chain by providing the RMI Template to our first-tier suppliers to gather information about their use of 3TG, the smelters and refiners in their supply chain that are included in our products, and the countries of origin for 3TG used in our products. We reviewed all responses for completeness, reasonableness, and consistency. We followed up for corrections and clarifications as we determined appropriate.
-

- d. *Supplier Engagement.* We continue to engage actively with our first-tier suppliers to strengthen our relationship with them. We have communicated to our suppliers our commitment to source conflict minerals in a manner that does not, directly or indirectly, benefit armed groups in the Covered Countries. We will consider alternative arrangements for our supply needs if our suppliers are unable to cooperate in our due diligence efforts.
- e. *Grievance Mechanism.* Our code of conduct includes procedures for reporting violations of our policies, and we provide mechanisms for anonymous reporting of violations or concerns about the conduct of our business, including the implementation and enforcement of our Conflict Minerals Policy.

2. Identification and Assessment of Risks in the Supply Chain

As discussed above, we identified our first-tier suppliers and relied on them to provide the necessary information about the use of 3TG in the products we purchase and incorporate into the manufacture of our oxygen concentrators, and the source of such 3TG. Similarly, our first-tier suppliers rely on information provided by their suppliers to provide information regarding the country of origin of 3TG included in our products.

3. Designing and Implementing a Strategy to Respond to Identified Risks

We will review circumstances in which certain suppliers are unable to provide us with complete or reliable responses to the RMI Template including, without limitation, considering whether to continue such contract or relationship or find a replacement supplier.

4. Carrying Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

We do not have a direct relationship with any smelters or refiners in our supply chain. As a result, we do not and cannot conduct any audits directly. Instead, we have supported the development and implementation of independent third-party audits of smelters such as the Responsible Minerals Assurance Program (“RMAP”) by encouraging our suppliers to purchase materials from audited, conflict-free smelters and determining whether the smelters that were used to process these minerals were validated as conflict-free by the RMAP.

5. Reporting on Supply Chain Due Diligence

We publicly filed the Form SD and this Report with the SEC. A copy of this Report and the Form SD are publicly available at <http://investor.inogen.com/>. This Report includes information about the RCOI methodology utilized by the Company, the design of our due diligence process in conformance with the OECD Framework, the list of known smelters and refiners utilized in our supply chain identified in our due diligence process, and a description of our products that incorporate 3TG necessary to the functionality or production of such products.

Smelters and Refiners in Inogen’s Supply Chain

We adopted RMI’s industry approach to trace back the origin of 3TG by identifying smelters, refineries, or recyclers and scrap supplier sources. We have leveraged industry initiatives such as the RMAP, which is a voluntary initiative in which an independent third-party audits smelters and refineries to determine if all of the minerals processed by the smelter or refiner originated from conflict free sources. Participation in the RMAP provides us with verified information about the sourcing activities of the smelters and refiners in our supply chain.

As discussed above, we submitted the RMI Template to our first-tier suppliers. Most of the responses received from our first-tier suppliers provided information at company/division levels, rather than specific product/part number levels. As a result, we were unable to determine whether or to what extent any of the 3TG reported as used by these first-tier suppliers was contained specifically in components supplied to us. We also were unable to validate whether

the smelters or refiners reported by such first-tier suppliers are actually in our supply chain. Accordingly, based on information that was provided by our first-tier suppliers or that was otherwise obtained through our due diligence process, we are unable to determine and describe all facilities used to process the 3TG contained in our covered products.

Based on the information that was provided by our suppliers and otherwise obtained through the due diligence process, we believe that, to the extent reasonably determinable, the facilities that were used to process the 3TG contained in the covered products included the smelters and refiners listed in Annex A attached hereto. This table includes only facilities that are listed in the RMI Smelter Reference List as of May 27, 2020. An indication of “Conformant” in the far right column of the table indicates that the smelter or refinery has successfully completed an assessment against the applicable RMAP standard or an equivalent cross-recognized assessment or is presently undergoing a re-audit to maintain its “conflict free” designation. An indication of “Active” in the far right column of the table indicates that the smelter or refinery has not yet received a “conflict free” designation, but is undergoing an audit process that will determine such status. An indication of “Unknown” in the far right column of the table indicates that the smelter or refinery was not included in the RMI “Conformant” or “Active” lists and thus the facility’s designation is undeterminable.

Because the RMI Smelter Reference List generally did not indicate individual countries of origin of the conflict minerals processed by smelters and refiners, we were not able to determine the countries of origin of the 3TG processed by the listed smelters and refiners with greater specificity. Furthermore, as stated earlier, submission of these smelters by our first-tier suppliers does not guarantee that these smelters or refiners are present in the Company’s supply chain as our first-tier suppliers were generally only able to provide company-level RMI Templates and not able to provide product-level RMI Templates directly linking those smelters or refiners to the covered products. Therefore, based on our due diligence efforts, we do not have sufficient information to conclusively determine the countries of origin of the 3TG contained in the covered products.

Additional Risk Factors

The statements above are based on the RCOI process and due diligence performed in good faith by Inogen. These statements are based on the infrastructure and information available at the time. A number of factors could introduce errors or otherwise affect our 3TG status. These factors include, but are not limited to, gaps in supplier data ; gaps in smelter data ; errors or omissions by suppliers ; errors or omissions by smelters ; the definition of a smelter not being finalized at the end of the 2019 reporting period ; all instances of 3TG necessary to the functionality or manufacturing of our products not yet having been identified ; gaps in supplier education and knowledge ; timeliness of data ; public information not discovered during a reasonable search ; errors in public data ; language barriers and translation ; supplier and smelter unfamiliarity with the protocols for identifying and sourcing potential 3TG; oversight or errors in conflict free smelter audits ; Covered Countries sourced materials being declared secondary materials ; companies going out of business in 2019 ; certification programs being not equally advanced for all industry segments and metals ; and smuggling of 3TG from the Covered Countries to other countries.

Future Steps

We have communicated our expectations to our first-tier suppliers regarding our commitment to sourcing minerals for our products in a manner that does not, directly or indirectly, finance or benefit armed groups in the Democratic Republic of the Congo or adjoining countries. We expect to continue our engagement with our relevant suppliers over the next year to build their knowledge and capacity so they are able to provide us with more complete and accurate information on the source and chain of custody of the 3TG included in components and parts purchased by us and incorporated into our products.
